

ENVIRONMENTAL POLICY

- OUR PRINCIPLE -

In recognising our environmental responsibilities we are determined, where ever possible, to exceed legislation and set standards within the food service industry. We benchmark ourselves against and are working in conjunction with the ISO14001 Environmental Management Standard.

We concentrate our efforts on:

- Compliance with all environmental legislation & relevant best practice
- Establishment of environmental risk management measures designed to minimise the likelihood & severity of our incidents & impacts.
- The establishment of relevant indicators to help us continually improve, in particular:
 - » Consider the most ethical, local, sustainable & environmentally friendly products & production methods.
 - » Minimise waste of disposable materials, fossil fuels, energy or other consumables work to eliminate any polluting emissions into our environment.
- The provision of appropriate information, instruction training & supervision to all team members to ensure our values & objectives are met.
- Carry out a formal annual review of this policy statement.

We shall always request and require our suppliers to comply with our exacting standards and adopt an open door policy for inspection by our clients and ourselves.

bartlett mitchell customers can rest assured that not only will we keep them up-to-date with our practices, but through consultation allow them to be in control of their environment.
